## United States Senate

COMMITTEE ON THE JUDICIARY

WASHINGTON, DC 20510-6275

September 24, 2025

Mr. Sundar Pichai  
Chief Executive Officer, Google LLC  
1600 Amphitheatre Parkway  
Mountain View, CA 94043

Dear Mr. Pichai,

We are concerned about some troubling employment trends in the tech industry. Earlier this year, the *Wall Street Journal* reported that the tech sector's unemployment rate was "well above" the overall jobless rate.<sup>1</sup> The Federal Reserve also found that recent American graduates with STEM majors now face higher unemployment rates than the general population.<sup>2</sup>

In evaluating the high unemployment rate for American tech workers, we cannot ignore the massive, ongoing layoffs ordered by you and your peers in Big Tech C-suites over the past few years. Over the past few years, Google has laid off tens of thousands of employees despite enjoying record profits. Earlier this year, Google laid off hundreds of tech workers in just its platform and device unit alone. Last month, you announced that Google had terminated 35% of its small team managers.

At the same time you have been laying off thousands of American employees, you have been filing H-1B visa petitions for thousands of foreign workers. In fiscal year 2025, you applied for and received approval to hire 4,181 H-1B employees, making Google the sixth-largest employer of newly approved H-1B beneficiaries in the nation. With all of the homegrown American talent relegated to the sidelines, we find it hard to believe that Google cannot find qualified American tech workers to fill these positions.

We would like to give you an opportunity to explain yourself. Please provide answers to the following questions, with accompanying data where appropriate, by October 10, 2025:

1. Why is Google hiring foreign tech workers when hundreds of thousands of American tech workers have been laid off over the past few years?
2. Does Google make a good faith effort to fill open positions with Americans before filing H-1B petitions? Explain in detail.

---

<sup>1</sup> Belle Lin, *IT Unemployment Rises to 5.7% as AI Hits Tech Jobs*, WALL ST. J. (Feb. 7, 2025), <https://www.wsj.com/articles/it-unemployment-rises-to-5-7-as-ai-hits-tech-jobs-7726bb1b>.

<sup>2</sup> Federal Reserve Bank of New York, *Labor Market Outcomes of College Graduates by Major*, <https://www.newyorkfed.org/research/college-labor-market#--:explore=outcomes-by-major> (showing unemployment rates for recent graduates with STEM majors like computer science (6.1%) and computer engineering (7.5%) that are well above the general unemployment rate of 4.3%).

3. Does Google hide H-1B recruitment ads by listing them separately from general hiring ads?
4. Has Google displaced any American employees with H-1B employees?
5. Are your company's H-1B hires provided the same salary and benefits as your American workers with the same qualifications? Please provide specific details.
6. How many H-1B workers at Google were recruited and hired at level one wages? How many of those workers are still working at level one wages?
7. Does Google outsource any hiring to contractors or staffing firms that place H-1B workers within your organization?
8. Of the H-1B workers currently working at Google, how many of those workers are employed and paid directly by Google?

Sincerely,

Sen. Charles E. Grassley  
Chairman  
Senate Judiciary Committee

Sen. Richard J. Durbin  
Ranking Member  
Senate Judiciary Committee
