

A once-in-a-generation investment to safeguard American families.

The Senate Judiciary Committee's title provides historic investments to strengthen America's border security and immigration system, support law enforcement and give front-line immigration enforcement officials the tools they need to recover from the Biden Border Breakdown.

The Judiciary Committee's legislative text:

1. Boosts funding for immigration agencies that were overwhelmed by the Biden Border Breakdown.
2. Reimburses states who stepped up to protect America's broken border during the last four years.
3. Expands resources for law enforcement officers who put their lives on the line to keep our communities safe.
4. Injects accountability into our immigration system and offsets immigration enforcement costs.
5. Combats judicial overreach.

Additional security provisions:

- Tamps down on the flow of deadly drugs like fentanyl by funding DOJ efforts to combat drug trafficking and precursor chemicals.
- Provides essential resources for U.S. Secret Service recruitment and training efforts in the wake of two assassination attempts against President Trump.
- Protects alien children from exploitation by funding fingerprint collection and DNA tests.
