Subject: Re: HR email

Steve,

I would like to recommend the opening of a criminal 58 matter on the person(s) at OPM who approved the transmission of the earlier email. That person in conspiracy with Elon Musk (who is reportedly an SGE), in addition to wasting a colossal amount of official time, encouraged, abetted, aided, etc. thousands if not tens of thousands of government employees to violate government wide security policy and transmit sensitive government information outside of a strict need to know. Furthermore, Musk used a non government system (twitter) to relate information that allegedly was for official purposes. In doing so, because he is monetized (he is a majority owner of twitter) he likely generated income for himself based on Twitter's monetization model and/or advertising revenues. His use of twitter in this and other instances is conceptually similar to Hillary Clinton's misuse of a private email server for government business. Furthermore, this likely violates 18 USC 208 and the terms of his SGE agreement - an SGE cannot monetize themselves with their government work.

Reading Musk's message even in the most positive light, that message threatened persons with firing if they did not participate in an act that violated policy. This potentially violates 18 USC 873.

Happy to write the case opening and find a prosecutor (or at least try). Alternatively, I am happy to report this to the OPM OIG or Congress.

And no, I'm not kidding.

-kg

Subject: HR email

Hey everyone,

There is an external HR circulating.

I will pass on additional information as I learn more from EM.

Thanks,
Steve
